

Basket Lamp Kits

Do You Collect Baskets?.....

.....then you know just how much you have invested in them. Why risk damaging them with an adapter that can mark or split the wood? *This adapter is specially designed to cushion and protect the handle as you turn your treasured basket into a lamp* It features a push-thru socket and 6' gold cord
02-150 Collector Basket Adapter w/ Gold cord

Now our Collector Basket Kit also comes with a smaller socket, giving the appearance of an ivory candle. Features the same protective bracket and cushioning as our original Collector Basket Kit (above)

- # 02-402** 2" Candle w/ Brown cord & switch, incl. bulb
- # 02-412** 4" Candle w/ Brown cord & switch, incl. bulb

Not Just For Baskets!!!.....
The kits on this page will allow you to attach a lamp fixture to a variety of things, such as a gardening sprinkler can, a bucket with a rigid handle, or whatever you can dream up! Shown at right, # 02-160

Regular Basket Kits

These adapters will let you turn a basket into a lamp when your are able to put a 1/4" dia. hole through the handle. On some open weave baskets (perhaps willow) it may be possible to slip the bottom bolt through the handle without drilling a hole.

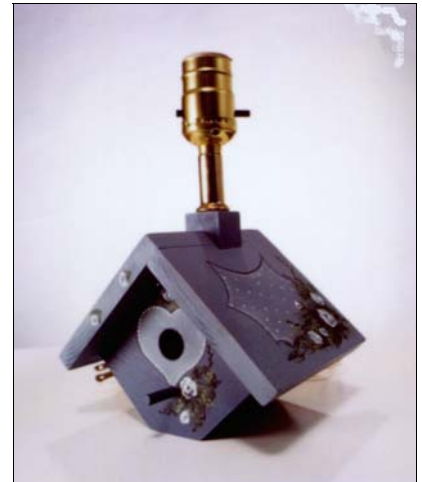

- # 02-160** Regular Basket Adapter Gold cord

Now also available with the smaller candelabra socket, ivory candle cover and brown cord w/switch, includes bulb. Appearance is similar to Collector Candelabra Kit (above left) but fastens through handle.

- # 02-432** 2" Candle w/ Brown cord & switch, incl. bulb
- # 02-442** 4" Candle w/ Brown cord & switch, incl. bulb

Birdhouse Lamp Kits

These kits are specially designed to let you add lamp wiring to a birdhouse or other small building for a cute and decorative lamp. Simply drill a 3/16" hole in a flat horizontal surface on the birdhouse (such as the top of a chimney, see picture at right) and screw in the lamp kit. Then just add a bulb and clip-on shade and you're done! The sizes listed refer to the distance between the birdhouse and the bottom of the lamp socket.

- # 02-311 Birdhouse Kit with 1/2" riser, white cord
- # 02-312 Birdhouse Kit with 1/2" riser, brown cord
- # 02-321 Birdhouse Kit with 1" riser, white cord
- # 02-322 Birdhouse Kit with 1" riser, brown cord
- # 02-331 Birdhouse Kit with 1.5" riser, white cord
- # 02-332 Birdhouse Kit with 1.5" riser, brown cord
- # 02-341 Birdhouse Kit with 2" riser, white cord
- # 02-342 Birdhouse Kit with 2" riser, brown cord

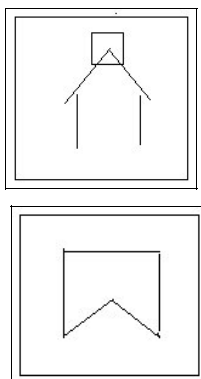

Our smaller birdhouse kits feature a candelabra socket, white candle cover & choice of white or brown cords. **This kit includes a tapered candelabra bulb. It is available in 2 different heights to suit a variety of applications...see below.**

- # 02-351 2" Candelabra Birdhs/ white cord
- # 02-352 2" Candelabra Birdhs/brown cord
- # 02-361 4" Candelabra Birdhs/white cord
- # 02-362 4" Candelabra Birdhs/ brown cord

These kits are not just for birdhouses! They can be screwed into any flat surface giving the appearance of a candle with the convenience of electricity. For more realism, we suggest using our flicker flame bulb (see pg.14)

If your birdhouse does not have a solid place to screw in the adapter, you can add a "chimney" of sorts to provide a solid level surface. Lay the birdhouse on a piece of paper and trace the shape of the rooftop to get the correct angle. Then cut out the shape and use it for a pattern. Using a block of wood at least 1" x 1" square and as tall as you want the chimney to be, trace the pattern onto the wood, then cut away the portion that matches the roof. You will have a piece that looks something like this. This piece may be set on top of your birdhouse and glued in place or attached with an air nailer or small tack nails. When it is firmly attached you need a 3/16" diameter hole drilled in the center top of the chimney to screw the lamp kit into.
